

Sugar Discover

Predictive Customer Insights – Zero Effort

Sugar Discover is a radical new approach to customer analytics that makes it incredibly fast and easy to extract insight from your Sugar data. Track and analyze hundreds of meaningful, actionable metrics automatically. Rewind history, understand trends, and make accurate predictions about the future with historical data analysis.

Sugar Discover surfaces what's important now, automatically alerting you to changes in key metrics that are trending significantly above or below target, or that break from historical patterns. Even better, Discover makes these alerts actionable by providing Discovery Insights – related facts and patterns in the data that could be contributing to the change. With Discovery Insights, you'll be able to quickly identify root causes and take action.

Unlike a general-purpose BI tool, Sugar Discover provides real value on day one. With Discover, there is no need to build and maintain your own analytical database, no need to learn SQL, no need to run ETL processes, no need to learn complicated general-purpose BI tools, and no need to hire expensive technical resources. Any person with basic Sugar user skills can be exploring revenue data and discovering actionable insights.
