

Sales History Dashlet for Sugar

Get straight to the point with Sales History Dashlet for Sugar, a custom User Interface that allows you to quickly access the data you need most!

Sales History Dashlet allows you to display and filter trackable data in Sugar in a flexible manner, while still respecting the visibility and permissions of the module displayed. Additionally, if you need to pull information from any external data sources, Sales History Dashlet for Sugar can make that happen.

Benefits:

- Can be configured to track and visualize any metric.
- Rank and compare users to identify your best performers.
- View sales history on any account record view without running a report.
- View and track sales forecast by product/type/manufacturer.
- Compare sales history to previous years or months at a glance.
- Track user activities in any module.
- Display sales data for any account viewed.
- Provides on-demand filtering to granulate the data.
- Rank and compare accounts in real-time.
- Color-coded graphs for easy distinction.
